Agricultural District Law adopted by the New York State Legislature in 1971 provides for the creation of Agricultural Districts to protect and promote the availability of land for farming purposes. Lands within Districts are protected from unreasonable local regulation of farm practices, the acquisition by public entities through the use of eminent domain, and the advance of public funds to construct facilities that encourage non-farm development. Additionally, land used in agricultural production within an Agricultural District is not subject to benefit assessments, special *ad valorem* levies or other rates and fees for the financing of improvements such as water, sewer or non-farm drainage. Presently, Ulster County has four certified Agricultural Districts containing around 71,500 acres of farmland.
